WORK EXPERIENCE:

AHA! BEHAVIORAL DESIGN

IT Asset Management Consultant

Pasig
March 2026 – June 2026

Led a four-month Google Workspace and IT Asset Management consultancy covering system audit, strategic architecture, full implementation, training, and documentation.

- Designed and implemented a centralized Asset Management System using Google Workspace, Google Drive, Google Sheets, and Google Apps Script.
- Audited folder structures, file ownership, permissions, governance controls, and data-handling workflows.
- Established standardized folder structures, metadata, naming conventions, version control, retention, archival, and disposal processes.
- Implemented role-based access, RACI governance, audit logging, project tracking, document approval workflows, and PII/IP security controls.
- Managed system ownership transfer, Google Drive routing, administrative access, and email notifications.
- Developed SOPs, user guides, technical documentation, and conducted system training and formal turnover.

ZENITH CAPITAL CREDIT GROUP CORPORATION

IT Support Supervisor

BGC, Taguig City
February 2025 – April 2026

- Led daily IT support operations and supervised the IT Support team, ensuring reliable technology services and timely resolution of incidents and service requests.
- Managed employee onboarding and offboarding, user access, hardware allocation, software provisioning, and the complete IT asset lifecycle.
- Established and improved IT support policies, procedures, escalation processes, and documentation aligned with ITIL-based incident, problem, and service request management practices.
- Coordinated infrastructure, business application, automation, and system implementation initiatives with internal departments, management, and third-party technology vendors.
- Monitored IT service performance and recurring technical issues and implemented continuous service-improvement initiatives.
- Mentored IT personnel and supported capability development across troubleshooting, systems administration, documentation, and customer service.
- Supported IT procurement, vendor coordination, technology evaluation, and operational technology requirements.
- Collaborated with business units to identify operational challenges and translate requirements into technology solutions.

Key Achievements:

- ✓ Led the implementation of Odoo CRM with a third-party implementation partner, improving sales and customer-management workflows.
- ✓ Designed and implemented Client Document Records System (DRS 2.0) to improve document organization, retrieval, security, and operational efficiency.
- ✓ Supported the organization's broader digital-transformation initiatives through workflow automation, system integration, and process improvement.
